# OTAN Website Accessibility Features

OTAN is committed to making our website content accessible to those with disabilities. In addition to striving to meet or exceed the requirements of Section 508 of the Rehabilitation Act (29 U.S.C. 794d), and Web Content Accessibility Guidelines (WCAG) 2.1 recommendations for making web content more accessible, an additional Accessibilty Menu has been added to the website with some helpful features. You can access this Menu in the upper left-hand corner of the OTAN website.

The following options can be toggled on and off as needed.

- **Menu Keyboard Focus** – Brings you immediately to the top of the page with the menu selected. This allows a person who is only using the keyboard to navigate the website to have the focus set to the first navigation item.

- **Skip to Main Content** – Brings you immediately to the relevant content on the page.

- **Large Font** – Increases the font size of all the content on the page. This helps increase readability for those who have difficulty reading smaller text.

- **High Contrast Mode** – Changes the website style to have a high contrast ratio between the foreground and background elements. High contrast can make the content easier to perceive.

- **Yellow Colored Links** – Highlights all clickable links with a bright yellow background. Yellow highlighted links can help make the clickable content stand out to people with visual accessibility needs.

- **Grayscale Color Mode** – Changes the website style and images to grayscale. This may help those who have difficulty perceiving certain colors or who are colorblind.

- **Underline Links** – Places an underline on all text links. Underlining links is another way to help text links stand out.

If you cannot access any content or use any features on this website due to a disability, please contact our Support Team via email at support@otan.us. Please include the URL and/or other identifying information if you are reporting a problem accessing specific content or features.
